

How-To Add a Video to a Webpage

Important to know: Video files tend to be very large. Depending on the file size, and your network speed, video may take a long time to upload. Once it is uploaded, it may take a while to convert to html5 format at eSchoolView . Once completely converted, it will display on the page and can be played

Please be aware this can be a long process and we suggest you begin the upload at a time when you can walk away from your computer for a time.

Prerequisites: must have a video file compressed to an appropriate format and under 1GB in size

Steps:

+ Add a Page Component

Choose Streaming Video from Type Dropdown

Give it an Internal Name

Save

Edit the component

Your existing videos will still play	via our Flash Object. You can upload them here to	use our new Video Component.
Video Titlo:	2

Date Expires.	(mm/dd/yyyy format)	
	Save 💋 Cancel	

- **1.** Be sure your **file type is supported**. Check (*most are...*)
- 2. Add a Video Title
- **3.** Add a **Video Caption** if desired. (*Title and caption will appear above the video*)
- 4. Autoplay option (video will play automatically when the page loads)

5. Browse to **Choose** the video file (*Be careful naming video files*! *Odd or extra characters will throw up an error warning*. <u>Keep it simple</u>- numbers and letters only)

6. Click **Save** and **OK** on the pop up window

7. WAIT

Note: The screen may look frozen. There is little indication that the files are uploading. You may be logged out while waiting. This is normal (*especially for large files*). Please read the notice at the top

	NOTE: Your video will be sized perfectly within your content window
	NOTE. Four video will be sized penecity within your content window.
